

CounterCache™

At a glance...

Security has always been important in the design of the CounterCache range. Often imitated, these robust POS security products continue to hold their position as the retailer's first choice products for cash protection. There are over 1/2 a million CounterCache units protecting an average of 1 billion dollars in global retail every day

Protecting over a billion dollars every day

Perfect note presentation

Secure locking system

Anti-fish mechanism

CounterCache™

Product features...

- > increases POS security, removing the cash removes temptation of till snatches & internal shrink
- > CounterCache removes the need to perform time consuming till skims
- > streamline cash processes with the use of the inner transportation cassette & security seals
- > integrated note restrictor prevents 'fishing' from the unit, once a note has been inserted it can only be removed with a key
- > dual key access adds to the robust metal construction for secure storage at the POS
- > an integrated vertical note stacker makes for a simple operation and provides excellent note presentation

Available Accessories

Flat or radial lock

Tamper evident pouch

CounterCache cassette

Numbered security seals

- > 1 year warranty as standard

You can further enhance the security of your cash processes with a range of CounterCache accessories from Volumatic. Security seals, either plain or numbered provide added security and an audit trail for cash that is transported by cassette from POS to the cash office. Spare cassettes reduce downtime during shift changes or cash lifts. Shift change cards provide operator accountability and cash trolleys provide secure transportation for multiple cassettes from shop floor to the cash office.
