SAMSTOCK

Versatility comes as standard with the new 52M Series!

The 52M series of cash registers are designed with a modern twin station drop and load thermal printer, this provides such features as in-built or custom graphic logos for receipts and bills. The series has been designed for all environments with three keyboard types, a flat 117 product keyboard or raised keys, either 15 or 40 products.
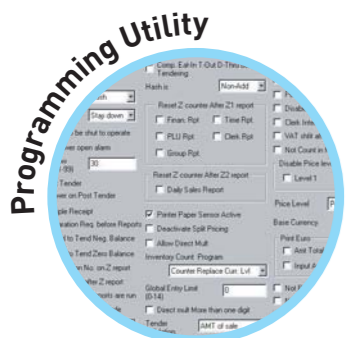

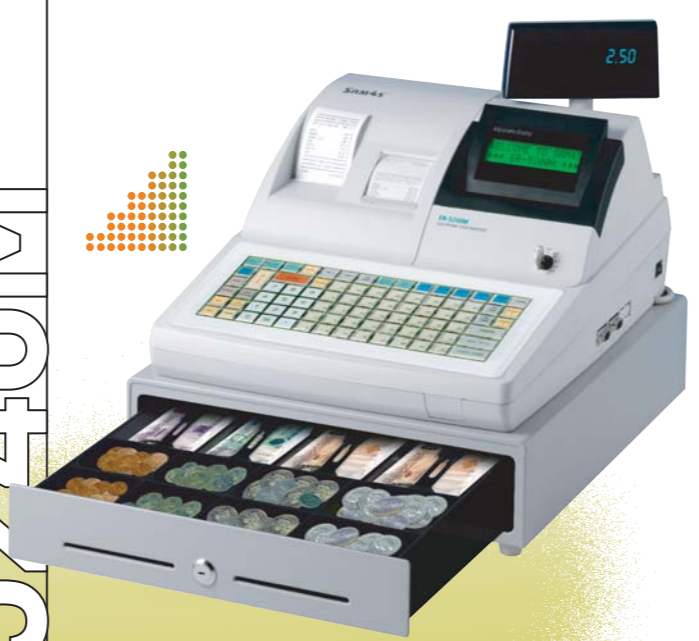

The series is also fully supported by a Windows based PC programming and reporting utility. A back office stock control solution is also provided for full management analysis stock valuation, historical sales, shelf edge label and many more features for all environments. The system provides hospitality establishments with features such as table tracking, clerk interrupt, kitchen printing and bill printing. This combined with the 5 level flat keyboard, two prices and numerous custom print/per product options and features.

The retail environment is also supported using raised keyboards and features including mix & match discounting and not found product creation providing the retailer with a low cost scanning solution with back office stock management. This is a comprehensive series which provides features for all environments, ensuring a low cost time efficient and easily maintained epos solution.
